

Work Experience

Full Stack Developer / DevOps Engineer — iCapo Tech Pvt Ltd (Living Things)

(Feb 2025 – Present, On-site, IIT Bombay, Mumbai)

- Containerized microservices using Docker, Docker Compose, and Kubernetes; optimized builds with multistage and distroless images, and integrated Trivy for vulnerability scanning.
- Built CI/CD pipelines with GitLab CI/CD and Gitea Actions, integrating SonarQube and Infisical for secure secrets; enabled Dev/UAT/Prod deployments, reducing release times by 20–30
- Set up an observability stack (Grafana, Prometheus, Loki, Alertmanager, Uptime Kuma, Blackbox Exporter) with 15+ dashboards and 50+ proactive alerts.
- Automated firmware CI/CD for 17 GSM and 17 WiFi protocols using Gitea Actions, implementing dependency handling, versioning, and GCS uploads—cutting release time from 2+ hours to 40 minutes.
- Built a release dashboard with device-type, version, and library filters plus MAC-ID search, enabling precise single or bulk device updates and reducing operations workload.

Internship — Digisnare Technologies

(Mar 2023 – Jul 2023, On-site, Gulbarga, Karnataka)

- Launched KKDIAL portal (500+ monthly queries), cutting manual lookups by 60%.
- Developed optimized REST APIs with MySQL, reducing response latency by 40%.
- Created documentation and 20+ unit tests, lowering post-release issues by 25%.

Skills

- **Languages:** Java, JavaScript
- **Web & Frameworks:** ReactJS, Redux, React-Router, Node.js, Express.js, Tailwind CSS, Bootstrap, Chart.js
- **DevOps & Orchestration:** Docker, Docker Compose, Kubernetes, AWS EKS, AKS, ArgoCD, Ansible, Infisical
- **Cloud & Event-Driven:** GCP Pub/Sub, Cloud Job, Google Cloud Storage (GCS), AWS Lambda, AWS Event-Bridge, SageMaker, Azure Storage Account, Azure Event Grid, Azure Functions, Azure Container Jobs
- **Observability:** Prometheus, Grafana, Loki, Uptime Kuma, Blackbox Exporter
- **CI/CD & Version Control:** GitLab CI/CD, Gitea Actions, SonarQube, GitLab, Gitea
- **Databases:** MySQL, PostgreSQL, MongoDB, Firebase
- **Tools & Design:** VS Code, Postman, Canva, Adobe Suite, Figma, WordPress

Projects

Ecommerce Application [GitHub] [Live Demo]

- Designed and developed a scalable, customizable ecommerce platform featuring user authentication, wishlists, carts, and seamless Razorpay payment integration, enhancing conversions by 35%.
- Optimized frontend with debouncing and lazy loading, cutting page loads by 45%.
- **Tech Stack:** React, Node.js, Express.js, MongoDB, Tailwind CSS, Razorpay, Git

Orthopedic Haptic Simulator (DST-Funded Project)

School of Computer Science, Central University of Karnataka

- Collaborated on a Department of Science and Technology-funded project aimed at enhancing orthopedic surgical training through an advanced haptic simulation platform.
- Integrated haptic feedback and stepper motor control using Raspberry Pi and Arduino Uno.
- Implemented collision detection and hardware synchronization features to improve immersion and accuracy in the simulator environment.
- Contributed to system architecture design and real-time control algorithms for an interactive, educational simulation experience.

Education

- **MCA (2021-2023)**, Central University of Karnataka CGPA: 8.3
- **BCA (2018-2021)**, Aims Institute of Higher Education, Bengaluru CGPA: 8.3

Achievements & Activities

- UGC NET qualifier (June 2024)
- Completed Full Stack Web Development Course at Geekster
